FROM TREXLER ETAL.

(TUE) 12. 16' 03 17:50/ST. 17:48/NO. 4860347702 P 5

Amendments to the Claims:

(Currently Amended) Computer software comprising computer readable code 1..

configured to create a printer label format based on a printed label that has been scanned, said

computer readable code configured to scan a label and then convert a the scanned label into a

label format using optical character recognition (OCR), wherein said computer readable code is

configured to recognize text on the scanned label as text, is configured to recognize graphics on

the scanned label as graphics, and is configured to characterize as graphics any items on the

scanned label which are not specifically recognized by the computer readable code, said label

format being useable to print labels.

(Original) Computer software as recited in claim 1, wherein said computer 2.

readable code is configured to recognize barcodes on the scanned label as barcodes.

(Original) Computer software as recited in claim 2, wherein said computer 3.

readable code is configured to determine at least one parameter about a barcode on the scanned

label, said at least one parameter comprising at least one of aspect ratio, size and human

readability.

(Original) Computer software as recited in claim 1, wherein said computer 4.

readable code is configured to prompt a user, using a visual display, to confirm that the objects

on the scanned label have been correctly characterized by the computer readable code.

Serial No.: 10/015,876

(TUE) 12. 16' 03 17:50/ST. 17:48/NO. 4860347702 P 6

(Original) Computer software as recited in claim 4, wherein said computer 5.

readable code is configured to allow the user to change any of the characterizations made by the

computer readable code.

(Original) Computer software as recited in claim 1, wherein said computer 6.

readable code is configured to allow a user to link at least one object identified on the scanned

label to a variable field.

(Original) Computer software as recited in claim 1, wherein said computer 7.

readable code is configured to allow a user to input embedded printer-specific non-printing

control codes into the label format.

(Original) Computer software as recited in claim 1, wherein said computer 8.

readable code is configured to provide that, once a label format has been created, said label

format can be saved and printed.

(Currently Amended) A method of creating a printer label format: comprising 9.

scanning a printed label; converting the scanned label into the label format using optical

character recognition (OCR), wherein text on the scanned label is recognized as text, wherein

said graphics on the scanned label is recognized as graphics, and wherein any items on the

scanned label which are not specifically recognized is characterized as a graphic, and after

scanning the printed lab 1, and converting the scanned label into a label format, using the label

format to print labels.

(Original) A method as recited in claim 9, further comprising using optical 10.

character recognition (OCR) to process barcodes on the scanned label as barcodes.

(Original) A method as recited in claim 9, further comprising using optical 11.

character recognition (OCR) to determine at least one parameter about a barcode on the scanned

label, said at least one parameter comprising at least one of aspect ratio, size and human

readability.

(Original) A method as recited in claim 9, further comprising using a visual 12.

display to confirm that objects on the scanned label have been correctly characterized.

(Original) A method as recited in claim 9, further comprising linking at least one 13.

object identified on the scanned label to a variable field.

(Original) A method as recited in claim 9, further comprising embedding at least 14.

one printer-specific non-printing control code into the label format.
